PROFESSIONAL SUMMARY

Software Developer at Capgemini with 1.5 years of experience building full-stack .NET applications, Generative AI solutions and workflow automation tools. As the team's Automation Lead, delivered 3 in-house automation tools, including one that cut a 1.25-hour manual process to about 1 minute (98% effort reduction). Skilled in C#, ASP.NET Core, Angular, Azure OpenAI and Microsoft Power Automate, with hands-on experience in prompt engineering and Agile delivery.

TECHNICAL SKILLS

Languages: C#, Python, SQL (MySQL)

Frameworks & Web: ASP.NET Core, .NET, Web API, Angular, HTML5, CSS3

GenAI & ML: Azure OpenAI, Prompt Engineering, RAG, Agentic AI, Amazon Q, ML, Deep Learning, NLP

Automation: Microsoft Power Automate, Outlook Automation, Workflow Automation, Data Validation, Custom Internal Tools

DevOps & Cloud: Git, GitHub, Jenkins, Docker, Kubernetes, CI/CD Pipelines, AWS (EC2), Azure

Testing & Practices: Jira, Unit Testing, Code Reviews, Agile/Scrum, SDLC, OOP, Data Structures & Algorithms

WORK EXPERIENCE

Software Developer | Capgemini, Noida

June 2025 - Present

- Served as the team's Automation Lead: identified manual, repetitive processes, proposed automation ideas and led multiple automation initiatives from idea to delivery, including requirement analysis, development, testing and rollout.
- PTA Automation Tool:** Designed and built an automation tool that reduced a 1.25-hour manual process to about 1 minute, cutting the team's manual effort by 98%, with built-in validation to ensure accurate, error-free output.
- Audit Log Validator:** Developed a tool that automatically validates audit logs, verifying the entire team's work within minutes, replacing time-consuming manual review and helping catch discrepancies early.
- Outlook Email Automation:** Built a Microsoft Power Automate flow that automatically captures key details from Outlook emails into structured data, enabling tracking, analysis and reporting without manual data entry.
- Developed Generative AI solutions using Azure OpenAI APIs, including chatbots and AI-assisted business tools.
- Led prompt engineering initiatives on Azure OpenAI, improving GenAI response accuracy by 18% and reducing error rate by 12% through iterative prompt refinement, testing and evaluation of model responses.
- Wrote NUnit unit tests and participated in code reviews to improve code quality, coding standards and maintainability.

Software Developer Intern | Capgemini, Navi Mumbai

April 2025 - May 2025

- Completed intensive training in C#, .NET, ASP.NET Core and Angular, gaining hands-on full-stack experience.
- Built a full-stack E-Banking web app as the capstone project, using REST APIs, a SQL database and an Angular UI.
- Applied best practices in API development, component-based UI design and SDLC in internal assessments.

PROJECTS

Online Banking Application

Tech Stack: ASP.NET Core Web API, C#, SQL, Angular, NUnit, Generative AI, Amazon Q

- Developed a full-stack banking app supporting account creation, deposits, withdrawals, transfers and transaction history.
- Built RESTful APIs in ASP.NET using a layered architecture (controllers, services, repositories) with a SQL database.
- Built a responsive Angular UI with customer dashboards for balances and transactions, integrated with backend APIs.
- Implemented secure login with role-based access for customers and managers, plus input validation and error handling.
- Wrote NUnit tests for core logic; used Amazon Q and GenAI tools to speed up coding, debugging and documentation.

Sign Language Detection System

Tech Stack: Python, NumPy, Pandas, Seaborn, Scikit-learn, ANN, CNN

- Built an ML system that recognises hand gestures from images and classifies them into sign language characters.
- Preprocessed the image dataset through resizing, normalisation and augmentation to improve model generalisation.
- Trained and compared ANN and CNN models, using Pandas and Seaborn to analyse and visualise performance.

EDUCATION

Bachelor in Computer Science (Hons.) | GLA University, Mathura

Aug 2021 - Aug 2025

CPI: 8.29/10 | Coursework: Data Structures, DBMS, Software Engineering, Cloud Computing, ML, DevOps, OOP

CERTIFICATIONS

Object-Oriented Programming with Java - Project: Chat Application

June 2024

Supervised and Unsupervised Machine Learning - Project: Stock Price Prediction Model

May 2024

Certified Google Cloud Practitioner

September 2023
